Introduction and Strategic Vision

The West Central area, designated 4a of Prosperity Region 4, is a six county rural region in West Central Michigan. The majority of the employment and workforce attachment is self-contained in the region. There is significant industry and agriculture, including food processing in the area, in addition to a number of workers who commute daily to the more urban centers in the 4b portion of the region, and some to neighboring regions to the north and east.

The joint West Central WDB & LEO support the Strategic Vision described by the Michigan Plan and are committed to work with partners on the Core programs in support of this vision by contributing to the overall goals outlined for the State.

The local vision is for the core services and outcomes to come together at appropriate points to link into the whole as given in the state strategic plan in specific areas identified, including:

✓ A Jobs Strategy supported by a demand driven system that focuses on industry clusters and meeting the needs of area employers.

✓ A Talent Enhancement strategy that supports economic development and workforce development to increase the skills of the workforce

✓ A strategy for youth that is supported by activities that prepare youth for further training and employment.

✓ A strategy for Adult Learners and Employers that is supported by Adult Education and work-based learning opportunities.

Specific activities and plans are discussed in this initial plan. The expectation is that the local plan will have additions as building the system progresses and opportunities grow.

1. Analysis of Local and Regional Labor Market Data

A. Regional Analysis and Local Data

Knowledge and Skills Necessary to Meet Employer Needs
Current Labor Market information (LMI) for West Michigan, provided by the DTMB, Bureau of Labor Market Information and Strategic Initiatives, and Quarterly Census of Employment and Wages (QCEW), shows that Constructions and Manufacturing, along with Professional and Business Services are leading all industries in talent needs.
Education and Health Services, Transportation and Utilities along with Leisure and Hospitality are following slightly behind. Private sector jobs continue to grow overall with the greatest change from 2011 to 2017. West Michigan outperformed the state in private sector job growth in every industry except for Professional and Business Services.

Source: DTMB, Bureau of Labor Market Information and Strategic Initiatives, Quarterly Census of Employment and Wages (QCEW)

High Demand occupations within West Michigan’s Construction Industry include job titles such as carpentry, civil engineers, cost estimators, plumbers, heating and air mechanics and installers, and first line managers and laborers. The Construction Workforce Development Alliance of West Michigan (CWDA) was created by the Associated Builders and Contractors Western Michigan Chapter (ABCWM), American Subcontractors Association of Michigan (ASAM), and Home Builders Association of Greater Grand Rapids (HBAGGR) and includes a collaborative of partners including workforce development, educators and construction employers. Although this council is primarily serving Region 4b, there is room for expansion based on employer need.

High demand occupations within West Michigan’s Manufacturing Industry include automotive, aerospace, pharmaceuticals, food production, machinery manufacturing, plastics product manufacturing, and machine shops. Region 4b is a key stakeholder in facilitating and maintaining the Discover Manufacturing council that includes employers, community partners, and training providers who all share the mission on expanding talent throughout West Michigan.
Recent projects of this council include Manufacturing Week, MiCareer Quest, promotion of Going Pro Apprenticeship Readiness Pilot Program, Adopt a School Program, Talent Pipeline Management (TPM) Employer Collaborative, M-CAM Mobile Manufacturing Lab, a partnership with Talent 2025 to conduct demand forecasting and better connect educational curriculum to employer needs, and the development of an updated Discover Manufacturing website (www.discover-manufacturing.com) that allows students, parents, educators, and employers to stay connected and engaged in manufacturing.

Within the Healthcare industry the job titles include: physicians, surgeons, dentists, technicians, RN, LPN, physician’s assistants, home Health aides and medical assistants.

The Professional occupation includes higher skilled and educated positions such as mathematical analysis, architecture, and art and designer.

West Michigan is also focused on the Transportation and Utilities industry and is addressing the employer needs by participating in state lead conversations that include employers, training providers, and workforce development staff regarding innovative ways to recruit, train, and retain qualified candidates. West Michigan offers training scholarships and career services for individuals under the Workforce Innovation and Opportunity Act (WIOA) who are interested in pursuing this career choice to include those who are considered hard to serve and re-entering citizens.

These occupations include employment opportunities for high school completers through those holding graduate or professional degrees. This trend aligns well with the goals of WIOA and will allow career pathway development and apprenticeship opportunities for those individuals who are accessing the workforce system.

Private sector jobs continue to grow overall with the greatest change from 2011 to 2017. West Michigan outperformed the state in private sector job growth in every industry except for Professional and Business Services.

As of the second quarter of 2017, approximately 19,600 jobs were advertised online in West Michigan, according to the Conference Boards’ Help Wanted Online Database. This is a decline of 4,300 ads since the 1st quarter 2016. The top job advertisements were for Registered Nurses with Heavy and Tractor-Trailer Truck Drivers and First Line Supervisors of Retail Sales Workers close behind.
The analysis on the projected occupational growth rates is suggesting that 44 percent of West Michigan jobs will still only need a high school diploma or less with short term or on-the-job-training. 34 percent of the jobs will require an Associate’s Degree, post-secondary training, some college with no degree, or a high school diploma or less accompanied with an extensive apprenticeship or on-the-job-training experience. Approximately 22 percent of the jobs will require a Bachelor’s Degree or higher. These projections mirror with the projections for the State of Michigan overall however the growth rate in West Michigan will supersede the state average before arriving at these outcomes.

**Source:** The Conference Board, Help Wanted Online Database

The analysis on the projected occupational growth rates is suggesting that 44 percent of West Michigan jobs will still only need a high school diploma or less with short term or on-the-job-training. 34 percent of the jobs will require an Associate’s Degree, post-secondary training, some college with no degree, or a high school diploma or less accompanied with an extensive apprenticeship or on-the-job-training experience. Approximately 22 percent of the jobs will require a Bachelor’s Degree or higher. These projections mirror with the projections for the State of Michigan overall however the growth rate in West Michigan will supersede the state average before arriving at these outcomes.
When comparing high-demand, high-wage jobs with educational requirements, Registered Nurses are expected to have the most annual openings according to the Bureau of Labor Market Information and Strategic Initiatives. Physical Therapists are showing the greatest growth percent with a fairly high median hourly wage. General and Operational Managers are showing the highest wages but the least amount of growth. This completed research confirms that pay level is directly correlated with the level of formal education and/or the length of the job training or apprenticeship.

Analysis of Current Workforce
An Analysis completed by the State of Michigan’s Department of Technology, Management and Budget Bureau of Labor Market Information and Strategic Initiatives provides the population estimate for West Michigan Prosperity Region 4 was at 1,596,000 people in 2017 (US Census Bureau). This is a 4.5 percent increase over 2011-2017, while the statewide population showed an increase of only 0.9%. The data shows that much of the increase was in Kent County, totaling more than 40,000 new residents. While West Michigan as a region was growing during this time (2011-2017) Mecosta, Newaygo, Osceola, Oceana Counties slightly lost population.
Further research conducted by this same source demonstrates the current workforce trends within Region 4. The data below will provide an accurate analysis of the labor force by demographics and education attainment levels.

On par with the increase in population, the labor force has also increased for a total workforce population of 824,432. With this increase, the area still maintained unemployment trends that followed both the Michigan State trends and the United States trends of steady decrease since 2011. From 2011 to 2017, West Michigan went from a 9.1 percent unemployment rate to a 4.0 percent unemployment rate landing 0.6 percent below the Michigan average and 0.4 percent below the United States average.

Looking at jobless rates by demographics, West Michigan experiences rates below the State average in every category except the Native American populations. Males age 16 and over show a slightly higher unemployment rate than females age 16 and over; however, this rate is still below the state average in both categories. West Michigan’s highest jobless rates are found within the sub category of males age 16-19 showing almost 23 percent, female age 16-19 showing 19 percent and Black/African American showing just over 16 percent.
When looking at the data provided by the U.S. Bureau of the Census, 2012-2016 American Community Survey Five-Year Estimates, the number of older workers staying in the labor market longer in West Michigan is slightly less than the State average. During 2012-2016, this group has had a 39 percent workforce participation rate (employed or seeking work) which is an increase of 2 percent. Overall, the total population and labor force rates remain slightly higher than the State average.

Poverty rates for West Michigan are just slightly below the state average with an estimated 17 percent of residents living below the poverty line. When broken down by demographics, West Michigan is fairly close to the State averages in all categories with the biggest exception being Hispanics which is showing a poverty rate of 15 percent higher. The data also shows a larger percentage difference in West Michigan between White, 12 percent falling below the poverty line, and Black/African American, 33 percent falling below the poverty line.

According to the Michigan Department of Health and Humans Services (MDHHS), there are approximately 46,610 welfare registrants in West Michigan. Both Female and Male registrants were fairly close with females making up almost 56 percent in Michigan, compared to the males making up 44 percent.

Based off of the U.S. Bureau of the Census, 2012-2016 American Community Survey Five-Year Estimates, West Michigan has a lower jobless rate compared to the state for white, Black/African American, and Asian Individuals. However, African Americans have the highest jobless rate among racial groups, at 16 percent over the 2012-2016 period.

According to the Michigan Department of Health and Human Services, roughly 46,900 assistance program registrants resided in West Michigan as of June 2017. This number is down by 18,500 individuals since December 2014. Over 60 percent of the assistance program registrants were white while only 18 percent were Black or African American. This data suggests that the Black or African American population is accessing welfare reform services at a much lower level.

Individuals with a reported disability account for 199,000 of West Michigan’s population. The demographic characteristics are similar to the State average with the biggest variance being between the white (86 percent) and Black / African American (8 percent) populations. The percentage of male and female individuals with disabilities in West Michigan is on par with the State average in both categories with the male to female share in the region being 49 percent to 51 percent.

Educational attainment is based on the number of residents 25 and older. In Michigan, that number includes 1,021,053 residents. Overall, the attainment rate for West Michigan is consistent with the overall state average; however, individuals holding Bachelors’ Degrees out performs the State average by 3 percent. The chart below demonstrates the educational attainment levels through 2024 for West Michigan in comparison to the State of Michigan.
Analysis of Workforce Development Activities

Although West Michigan has experienced population increases, a steady decrease in unemployment rates, and slightly better than state averages in most of the workforce trends, it remains a region in need of intentional workforce development. This includes seeking ways to provide access to those not currently utilizing the welfare reform or other workforce systems, provide one stop barrier removal services in coordination with existing and newly sought out community partners, better preparing individuals to attend various training opportunities, and finding ways to increase the labor force by re-engaging people with disabilities who are otherwise capable of working. West Michigan is relentlessly pursuing innovative and relevant solutions to these challenges through unique partnerships and resources to meet individual and employer needs.

Using sector strategies, the Region 4 Michigan Works! agencies continue to convene and connect to create a network of partners to meet the demands of the region’s current employers as well as the emerging industry needs in order to achieve a skilled workforce.

As previously mentioned, Industry Councils are being established within the region to help identify employer needs from the industry-wide perspective. These councils allow for the identification of best practices and shared strategies as well as increased articulation of what areas employers may need workforce development assistance.
Key roles of each of the industry sector councils include:

- Information conduit; sharing trends and best practices affecting talent.
- Talent Initiatives; leading, supporting and promoting talent initiatives throughout West Michigan.
- Training Needs; sharing current training needs with educational partners to develop curriculum, create career pathways and nurture a supply chain of talent.
- Networking; promoting networking among employers, educators, workforce development and economic development professionals for the purpose of developing a skilled workforce.

Educating Youth and enhanced outreach activities allows for a better understanding of what the regional economy looks like and what career opportunities are in existence post high school or following postsecondary education. Building the talent pipeline will increase the skilled talent pool and retain young people in our area. MiCareer Quest (http://www.micareerquest.org), a region wide career exploration event for youth, Jobs for Michigan Graduates (JMG) and the Summer Youth Work Experience Program are all examples of current workforce development activities targeted at increasing the local labor force and addressing the education and skill gaps in our region.

West Michigan is also focused on identifying and advocating to provide more meaningful and efficient services to individuals with disabilities. These initiatives include addressing the infrastructure improvements needed to lessen the barriers brought by housing, transportation, and internet access as well as increasing the training and employment opportunities that are available to this population. Michigan Rehabilitation Services (MRS) is a core partner and a representative is co-located inside of many of the service centers. In addition, West Michigan has established relationships with Michigan Bureau for Blind Services, Disabilities Advocates, and Disability Networks. These agencies are sharing resources and are at the table investigating ways to share common intakes, assessments, and making direct connects to opportunities.

In rural areas or where public transportation is unavailable, support services, such as gas cards or auto repairs, may be provided to assist individuals with getting to and from workforce development activities including education and employment. Though the causes of transportation barriers are different, these barriers exist in both urban and rural areas of the region.

Adult Education and Literacy programs are made available through established and emerging partnerships with local providers. Some of the West Michigan Region 4 Service Centers provide instruction and testing onsite or through direct services. In areas that have expanded resources, community conversations and informational tours are taking place to increase awareness of workforce development services. In some communities, Michigan Works! staff conduct workshops and initiate career coaching as part of the educational curriculum.
Short term Occupational Skills Training and Higher Education opportunities are also available throughout the region and are funded with local WIOA Adult, Dislocated Worker and Youth allocations for those who qualify. Region 4 works closely with training providers to ensure that the supported programs lead to an industry recognized credential and that the credential falls in line with employer demand. Recent initiatives have also shown that training providers including community colleges are responsive to the development and delivery of a curriculum that directly addresses the skill gaps.

The geographic factors of Region 4 presents many challenges to both the rural communities and employers. Although some training opportunities are offered online, many are only available in the urban areas making transportation a barrier that often discourages individuals from pursuing Occupational Skill Training or Higher Education. Commuting patterns suggest that many people living in the rural areas are working in urban locations however there is still a large gap presented for both employers and residents when they are not able to obtain the skills needed to live and work in the same community. Efforts to better assess training needs and accessibility of training programs are being made in collaboration with the West Michigan Industry Councils, Higher Education providers, Vocational Training partners, Michigan Rehabilitation Services (MRS), Adult Education providers, Veterans Services, and other community partners.

Work-based training is available and is a viable option that allows individuals to learn the skills that employers need without attending an occupational skills based or higher education training. Depending on the desired skill, the training type and the length of the training, this may assist residents with employment opportunities that will require an education attainment of high school diploma through Associates Degree (approximately 80 percent of projected jobs). Work-based training can be funded with local WIOA Adult and Dislocated Worker allocations and for those who qualify, this is a very desirable option.

Work-based training opportunities include:

- **On-The-Job-Training** – intended to provide a participant with the knowledge and skills necessary for the full performance of the job. OJT is a critical tool that can help job seekers enter into successful employment. The term “on-the-job training” means training by an employer that is provided to a paid participant while engaged in productive work in a job that:
  - Provides knowledge or skills essential to the full and adequate performance of the job;
  - Provides reimbursement to the employer of up to 75 percent of the wage rate of the participant for the extraordinary costs of providing the training and additional supervision related to the training; and
  - Is limited in duration as appropriate to the occupation for which the participant is being trained, taking into account the content of the training, the prior work experience of the participant, and the service strategy of the participant, as appropriate.
• **Pre-Apprenticeship Training** – designed to provide work experiences that can help participants obtain the skills needed to be placed into a registered apprenticeship.

• **Registered Apprenticeships** – designed to combine paid learning on-the-job and related technical and theoretical instruction in a skilled occupation. This training is an important component of the education and training services that the workforce system can provide to its participants, and should be used as a strategy to train and employ job seekers. Registered Apprenticeships offer job seekers immediate employment opportunities that usually pay higher wages and offer continued career growth.

• **Customized Training** – aimed at meeting the special requirements of an employer with a commitment to employ after successful completion of the training.

• **Incumbent Worker Training** – designed to assist employers with training current workers in specific circumstances to meet the needs of employers and increase the skill level of workers.

• **Transitional Jobs** – designed to work with employers to assist individuals with barriers to employment who are chronically unemployed or have an inconsistent work history. The goal is to establish a work history, demonstrate work success, and develop skills for the individual that will lead to employment. Employers assisting in this realm have no obligation to hire the individual after the training is completed.

B. Strategic Vision

As described in the introduction, we see the area as contributing to the success of both, the local area, the region and the State by focusing contributions on specific strategies outlined in the State plan.

C. Local Performance Goals for WIOA Adult, Dislocated Worker, Youth, Adult Education, and Literacy, Wagner-Peyser, and Vocational Rehabilitation

Michigan Works! West Central participated in performance goals negotiations with the State of Michigan Talent Investment Agency. The following goals were agreed upon between both entities:
## Performance Goals (PY 2016/2017)

### D. Local Strategy to align local resources for Core Programs to achieve strategic vision and goals.

There are several ways local resources are aligned and areas where items toward alignment to attain the strategic vision are in place and under development.

The view of alignment is that programs and funding designated for specific purposes and populations have a long history and expertise in the delivery of services to the populations and individuals they serve.

The WIOA Adult and DW programs along with the WIOA Youth program and Wagner Peyser funding are administered and operated by Michigan Works! West Central. Services are aligned by virtue of being provided under the same delivery umbrella and by staff who are trained in the different programs. The Adult, Dislocated Worker programs are aligned both by being similar in design and by being provided by the same staff. The WIOA youth program is also provided using the same process; with customers, being served by the program that best meets their needs, including services that are concurrent or consecutively delivered.
The Employment Service provided with Wagner-Peyser funding is a service that is provided by Michigan Works! West Central staff. The staff work together and frequently, jointly provide basic services to customers. This alignment is expected to continue. It facilitates cross training and keeps staff up to date by being involved in the delivery of multiple activities.

The provision of RESEA services is an ES service that brings persons identified by the Unemployment Agency as likely to exhaust unemployment insurance, is another opportunity to recruit dislocated and adult workers who may need additional skills.

**Adult Education** using WIOA funding is a small but important part of the overall strategy. Federal funding plays an important role in the overall services to adult learners. There are two school districts that receive this funding in the West Central area. They are Fremont Public Schools and Mason County Central Schools. They operate several sites in the six county area. The partnership includes the WIOA programs participating in outreach and recruitment access to WIOA services. Fremont Public Schools for example runs GED preparation and high school completion in the Big Rapids and Reed City Centers. A representative from Mason County Central Adult Education represents this sector on the WDB. Mason County Central provides GED preparation and high school completion from the Baldwin and Ludington Center. While Lake Adult Education provides GED preparation and high school completion in the Shelby office.

The federally funded services are in addition to the State Adult Education programs that are coordinated from the Kent ISD in Kent County for Region 4.

The local strategy is to maintain and strengthen the linkages with Adult Education customers. West Central is a GED testing site, and provides access to on line preparation in five counties where GED testing would otherwise not be available. GED testing is available in Mason County from West Shore Community College.

**Vocational Rehabilitation** is provided by Michigan Rehabilitation Services or MRS, which is a part of the Department of Health and Human Services. MRS staff are co-located at West Central Workforce Development and DHHS offices. There is a history of good communication and cross referral of customers.

The strategy is to maintain and expand the level of cooperation and services to persons with disabilities by encouraging services and case management linkages to mutual customers. One way to monitor progress is to build in meetings on a regular basis which include program management to review how the partnership is going. Bi-Annual meetings are suggested initially, with changes as needed by the partners.

2. Description of the Workforce Development System in the local area
A. The programs included in the system:

The Core programs include:

- WIOA Adult
- WIOA Dislocated Worker
- WIOA Youth
- Adult Education
- Wagner-Peyser
- Vocational Rehabilitation

Non-Core Programs

- Partnership Accountability Training Hope (PATH) providing job assistance and training to parents receiving cash assistance.
- Migrant and Seasonal Farmworkers, provides specialized services to migrant and seasonal farmworkers that are delivered through local Agricultural Employment Specialists.
- Trade Act, provides training to workers who have lost their jobs as a result of an increase in imports or shift of jobs to foreign countries.
- Fidelity Bonding Program of Michigan, which assists high risk job seekers in obtaining employment by providing an incentive for employers to hire job seekers who are qualified but may be considered high risk.
- Offender Success Program, working with the Michigan Department of Corrections and local partners assisting with employment and training for persons paroled in the service area.
- Telamon Corporation, the National Farmworker Jobs Program (NFJP) provides eligible farmworkers and their dependents with the means to reach self-sufficiency through better employment.

B. Local Board Strategy to Work with Core Programs and Other Programs

As stated earlier, the WDB/LEO oversees the Core Programs of, WIOA Adult, Dislocated Worker, Youth, and Wagner-Peyser. They also oversee the Trade Act and PATH programs. These programs are operated by Michigan Works! West Central staff. All services that
cannot be provided by staff in-house are offered through various Memorandum of Understanding with entities throughout our six county region.

The delivery of these programs is largely integrated with each other, with cross-trained staff providing a comprehensive array of training and preparation for employment of activities to the extent allowed by the individual programs.

The strategy is to provide general direction to the programs under the guidance of the boards to meet the needs of business and job seeking customers, and preparation to enhance the job readiness and skill level of the workforce, as part of an overall strategy to play our part of serving the overall region.

Close coordination with agency partners, both in the Core Services of Vocational Rehabilitation delivered by Michigan Rehabilitation Services and Adult Education, where the strategy is both to support these efforts in providing specialized services to the eligible populations for those programs, and to include these programs as part of the overall regional effort. The goal is for participants of Vocational Rehabilitation Services and Adult Education to benefit from the specialized services they are eligible for, and recognizing the talents of these individuals make important contributions for their benefit in working toward self-sufficiency, and the benefit of employers and the overall region.

Coordination also takes place with the Senior Community Service Employment Program (SCSEP). The SCSEP is a job training, work experience program for individuals 55 or older currently unemployed with a family income at or below 125% of the Federal Poverty Guidelines. The participants are placed in a work experience at a public or non-profit agency for an average of 20 hours a week to increase job readiness skills to become more employable make a self-sustaining wage.

Each partnership is unique and the services available are important to the populations served. For example, the PATH program involves intensive and ongoing communication and working relationships with the Department of Health and Human Services, to the extent that the program is truly operated by two agencies doing their individual parts. This level of close coordination and working relationship results in the successful delivery of PATH services.

The non-Core programs of Trade Act, are operated as part of Wagner-Peyser as they have been historically based on funding and authorization, and because of the requirement for merit based staff. These programs are also integrated and are part of existing services delivered directly by Michigan Works! West Central staff selected by the board. The Fidelity Bonding is also available through the Wagner-Peyser services, as access and application points, although it is administered by the WDA.
The Region 4 Offender Success program effort is also administered by the local boards for an expanded area of thirteen counties, six of which are under Michigan Works! West Central. The other counties in the Region 4 Offender Success area include Allegan, Barry, Ionia, Kent, Montcalm, Muskegon, and Ottawa.

Funding for education through the Carl D. Perkins legislation has an impact on joint customers. Funding for training, equipment and special populations are available to qualifying students, and there continues to be a significant overlap of participants in the youth and adult populations. The delivery of services is based on the needs of the individuals who are served and ongoing linkages at the staff and administrative levels.

3. Description of Local Board working with entities to carry out Core Programs and other programs

A. Expand access to employment, training, education, and supportive services for eligible individuals, particularly eligible individuals with barriers to employment

The Local Board via administrative staff work with program staff on plans to serve customers and expand the reach of outreach activities to increase awareness on potential customers and employers to use the services available for the programs under the oversight of the board.

Some programs and activities, including WIOA training activities, and services provided by Michigan Rehabilitation Services and Adult Education have a finite amount of funding available which limits their capacity. These programs have some flexibility, but there is little opportunity to meet the need with the funding they have. Linkages and shared costs where possible help, and is desired on a customer-by-customer basis but there is little remaining capacity for expansion. For this reason, expanded access through awareness and use of the system may have a modest effect on the number of participants who receive training and other services.

Activities that work with employers and job seekers on matching skill levels with employment and modest training are key to expanding access to result in more job matches and job placements. These activities are based on awareness and using the Workforce Service Centers as the One Stop shopping and increasing the effectiveness of employer and job seeker services, including to veterans and persons with barriers to employment.

B. Facilitate the development of Career Pathways and co-enrollment, as appropriate in core programs

The number of job seeking customers may be expanded using co-enrollment or consecutive enrollment as tools to provide more services that are comprehensive. The use of common or consecutive employment plans among partners will facilitate the use of Career
Pathways. Co-enrollment is common where it benefits the participants, and is used to provide more services that are comprehensive, beyond what a single program may provide. Sequential enrollment is also common, as participants complete one facet of their training and move to the next.

The area uses Michigan’s Industry Cluster strategy to target training to be both employer driven and to use Career Pathways developed for targeted industries and employers. This includes identifying persons seeking training in identified Industry Clusters as a local priority group for services. The focus on Industry Clusters, Manufacturing and Health Care have been targeted, is not exclusive, as employers with a need for workers in related or other industries are also part of the employer driven system and these other employment opportunities are important in the smaller local economies that make up the region. In addition, in recognition of the significant commuting pattern of workers, primarily within Region 4, and to adjacent regions, West Central recognizes the Industry Clusters selected for West Michigan Works! to be employer driven as part of the regional effort.

C. Improve access to activities leading to a recognized postsecondary credential

Training remains a key to both employment for workers and meeting the needs of employers. Improved access is an outcome of the increased awareness of the services available at Workforce Service Centers and additional coordination among partners.

An emphasis will continue to favor short-term trainings or the WIOA programs becoming involved in the last one or two years of training.

This includes the development of credentials with education and employers that can be used for those immediate job openings that require training on the job.

4. Description of Strategies and Services that will be used in local areas to:

A. Facilitate engagement of employers, including small employers and employers in in-demand industry sectors and occupations, in workforce development programs.

Employer engagement will be expanded via a strategy that builds on the strengths of the current delivery system from providing job matching of job seekers and employers, training of current workers via the Skilled Trades Training Fund by application and Incumbent Worker training, and new workers via OJT. New hires that have also been trained prior to hire via WIOA and other training will be closely tied to employer demand and will often use the Industry Cluster Strategy.

The addition of a second Business Services representative has enabled additional contacts and services, and an expansion of services via agency partners; including Michigan Rehabilitation Services which can assist employers in meeting the needs of workers with disabilities and assuring, they are up to date in meeting requirements for access.
The opportunity to add employers involved in the system is expected to increase as the need for workers increases. More job openings are expected to be available and the often-noted mismatch of skills will continue to be replaced by training workers who lack skills for entry-level positions that are candidates for career pathways.

B. Support a local workforce development system that meets the needs of businesses in the local area.

Employer Driven is more of a mission statement than a goal, thinking of the employer customer as the customer who hires the workers trained and prepared or matched through the employment and training system simply needs to be a part of how the system thinks and responds.

The challenge is training ahead for jobs projected to be ahead in time. For that reason, the training tends to focus on current and projected needs.

Involving employers, who will provide training to their specific needs, often after the more general occupational training available, will play a large part in employer engagement and meeting the needs of these employers who are often small or mid-size.

The area provides Incumbent Worker training and facilitates the applications for the Skilled Traded Training Fund. These are used as opportunities to inform businesses about additional services. On-the-Job training is also used to meet the needs of businesses.

C. Improve coordination between workforce development programs and economic development.

Coordination is very good, with Michigan Works! participating in a number of employer visits and retention calls with economic development professionals and linking closely with MEDC on Skilled Trades Training Fund contacts and employer visits.

Additional linkages involving LMI and Business Services will allow for interaction to be expanded through the sharing of information and involvement at appropriate points.

Our efforts to date fully recognize the importance of both new businesses, and the retention and expansion of existing businesses. The addition of a Business Services Specialist increases both the outreach to employers and ability to coordinate with economic development.

The area has hosted training on Apprenticeship for economic developers, Community College and University, and local Intermediate School Districts.

D. Strengthen linkages between the one-stop delivery system and unemployment insurance programs.
Through the Wagner Peyser program, Michigan Works! West Central will provide the Unemployment Insurance Agency Work Test for claimants to ensure that they are able to work, seeking work, and have not refused suitable work. In addition to the Work Test, Re-employment services are provided to those we will benefit from more intensive staff assisted services.

A designated group of individuals receives services through the Reemployment Services and Eligibility Assessment (RESEA) program. These individuals are referred directly to Michigan Works! from the UIA. The goal of this program is to provide one-on-one services to claimants deemed most likely to exhaust their UI benefits prior to obtaining employment. Direct individualized services to the RESEA participants makes it more likely that they will return to the workforce quicker.

Michigan Works! West Central will have the up-to-date UIA forms readily available to the general public and will also assist individuals with obtaining forms electronically. The UIA help number is provided to claimants when necessary.

5. A description of how the local board will coordinate local workforce investment activities with regional economic development activities that are carried out in the local area and how the local board will promote entrepreneurial skills training and microenterprise services.

The board will work with economic development to further coordinate activities, and build on the excellent linkages in place. Additional linkages are always possible, and a regional perspective is desired that can be fostered through the local Workforce Development Board. The Right Place in Grand Rapids is also providing economic development services in Newaygo County. This linkage and the close relationship with West Michigan Works! will foster increased involvement and promote regional thinking.

Thinking regionally will help coordinate these activities for new and existing businesses. For example, the state Labor Market Information staff are able to provide information about the labor force for a commuting radius around the employer’s place of business. This information does not consider boundaries but gives the area an opportunity to plan and coordinate services for specific employers, or groups of employers in an area.

Entrepreneurial skills and specific training is available via several educational institutions, and will be examined when the skills involved are linked to the larger employment market, thereby giving participants additional options and opportunities appropriate to their situations at different times in their careers.

6. Description of the one-stop delivery system in the local area, including:
A. How the Local Board will ensure the continuous improvement of eligible providers of services through the system and how those such will meet the employment needs of local employers, workers, and jobseekers.

Continuous Improvement in terms of services would be measured and achieved in several ways. Using information on the populations served and the outcomes attained will enable continuous improvement to be considered from both the aspect of increasing performance over a period of time, but increasing services to those individuals with additional barriers to employment, and whose barriers warrant significant investment of funding to address. Given the opportunity to make recommendations on these factors is seen as a major opportunity for input and suggestions that are appropriate for the local resources and delivery system.

Joint meetings of the WDB/LEO will include a showcase that frequently includes an employer and/or participant or program that has received or delivered services. This promotes involvement and awareness of the practical application of services provided and a familiarity with the programs. Partnerships will be highlighted. These meetings also include a review of performance and expenditures by as well as progress toward meeting enrollment goals and outcomes.

B. How the local board will facilitate access to services provided through the one-stop delivery system, including remote areas, through the use of technology and other means.

Each county has a Workforce Service Center that is open during regular business hours. In addition, staff from programs frequently meet with customers and employers on site, for recruitment and specific programs. These include the Skilled Trades Training Fund, Incumbent Worker Training, youth programs, Trade Act orientations and hiring events.

Customers may request alternate times to meet with staff when there is sufficient reason and phone and e-mail contacts are available. Outreach may be arranged on site with employers and schools for example.

Business Service representatives have frequent contact with employers and facilitate outreach and recruitment activities and other services.

C. How entities within the one-stop delivery system, including one-stop operators and the one-stop partners, will comply with the nondiscrimination provisions of the WIOA (Section 188), if applicable, and applicable provisions of the Americans with Disabilities Act of 1990 regarding the physical and programmatic accessibility of facilities, programs and services, technology, and materials for individuals with disabilities, including providing staff training and support for addressing the needs of individuals with disabilities.
West Central requires all staff to comply with these requirements and there is annual training for staff.

D. A description of the roles and resource contributions of the one-stop partners.

The roles for the Core programs are to coordinate or co-coordinate services with other WIOA services and activities. Non-Core programs coordinate referrals and services for individuals and may be integrated into the system.

Coordination involves both an awareness of the services available, which is largely in place and coordination both for individuals who can best be served by two or more programs.

The two basic types of partnership are with the Core Programs where there is cost sharing. The Core programs administered through the Michigan Works! system is delivered through an integrated system where contributions are determined. The MRS and Adult Education Core programs provide services from area Centers and contribute to the Centers in both coordinated services and use of space in the Centers they use.

Some non-Core programs have linkages, there is cross referral of customers, and the numbers are small with each program paying for the services they provide. In these cases, cost sharing may be minimal or may not be done. For example, when the service is provided and use of the Center is sporadic, intermittent, and driven by an occasional customer.

7. The Assessment and the type of activities available in the local area to adult and dislocated workers.

Activities available to Adult and Dislocated Workers include an assessment of their experience and skills based on work history and training, interest, and an approved test.

Activities range from Career Services to Training Services and include OJT, and ITA training. Three Party OJT’s involving employee leasing and temporary employment are included. Training Services with or without an ITA, those based on accompanying an OJT or Work Experience for example will be prioritized to training that provides a credential or certification, including certification that is stackable at the beginning of a series of possible trainings. Without an ITA refers to training provided in conjunction with an OJT, or Customized or Incumbent Worker training.

This is a continuation of having allowable activities available to meet the needs of employer and job seeking customers. A theory of having the activities available is similar to having more tools in the toolbox. ITA and OJT are the primary activities. Other activities may be provided as needed.
These activities partner with other training funds, including the Skilled Trades Training Fund, and collaborating on participant based funding such as Adult Education and Vocational Rehabilitation.

8. Description and assessment of the type and availability of youth workforce investment activities in the local areas.

Youth activities include activities provided with WIOA funding as noted in Policy Issuance 16-01, some activities may be provided through linkages or by local entities, including school districts and alternative schools. These include tutoring, dropout prevention, alternative secondary school including cyber schools, and various occupational and entrepreneurial training.

Work Experience, Occupational Skills Training, Supportive Services, guidance and counseling and financial literacy are common activities for the program. Some activities like financial literacy may be provided by the program or by other entities.

Other funding may be leveraged to augment services, for example, the area has benefitted from training funding for youth from the DTE Foundation through United Way of the Lakeshore, which is used for wages to participants.

The definition “requires additional assistance” for youth eligibility will use the items given in the State plan and in addition, the criteria: has not held a full-time job for more than 13 consecutive weeks is modified to add, or 400 hours, as certified by the applicant/participant and the criteria, does not have training or an employment history for longer than the 13 weeks is modified to add, or 400 hours in the occupation or industry cluster they are seeking training in. This may be stated, as does not have training or experience in the occupation they are seeking training in.

9. Information regarding any waivers being utilized by the local area, in accordance with any Michigan Talent Investment Agency/Workforce Development Agency (TIA/WDA) communicated guidelines or requirements regarding the use of the waivers.

Michigan Works! West Central has acknowledged that the State of Michigan has been granted a waiver to lower the out-of-school expenditure requirement from 75% down to 50%. At this time, Michigan Works! West Central will not be utilizing the waiver.

10. Description of how the local board will coordinate relevant secondary and post-secondary education programs and activities with activities with education and workforce investment activities.

WIOA funded post-secondary education will be focused on preparing the participant for employment in a demand occupational area. This activity will be coordinated with other funding, including grants, and services, such as services to special populations with educational
institutions to provide needed services to assure the success of the participant. Coordination in this example would be with the Case Manager, the Special Populations staff at the educational institution and the participant.

At the secondary level school based activities, including training at alternative and cyber schools that promote dropout prevention and high school completion, may be linked to work experience that assist the participant in job readiness and the application of training learned. Coordination again occurs at the local level with the Case Manager, staff at the school and participant, to assure consistency in providing services and participant goals.

Michigan Works! West Central works closely with the Adult Education providers in the area. In five of the six Michigan Works! service centers, Adult Education is co-located and provides services directly at the service centers. The co-location promotes collaboration and assists all programs with referrals. Adult Education and Michigan Works! collaborate to identify student needs and align services to meet student goals without duplication of services.

Duplication is avoided by close coordination, except in unusual cases where the receipt of separate but coordinated services is part of the action plan for the participant. For example, if funding is coordinated, several programs may assist a participant and assure that the same item is not paid for twice, but that the participant receives the support they need.

11. Determination if the MWA will provide Supportive Services and Needs Related Payments

The MWA plans to provide supportive services to participants that enable them to participate in activities and services in their ISS. There will be restrictions governed by local and state policy among various programs including PATH to keep the payment amounts similar or within an acceptable range.

Supportive Services are provided by the Talent Specialist for Career Services, and Youth Services. They are provided to enable the participant to participate in activities covered in the ISS. This includes services needed to participate in WIOA funded activities and activities that may be funded by other programs or entities that assist the participant in participating or receiving the services given in the ISS. Determinations are made on an individual basis.

Service are requested, approved and tracked. Support Services may be provided in consultation and support of other programs and funding and may be part of a costs sharing. Michigan Works! West Central has a Board approved local support service policy with the parameters outlined below.
Date: January 16, 2017

To: MWWC Service Providers

Subject: Supportive Services and Needs-Related Payments

Programs Affected: WIOA Adult, Dislocated Worker, Youth, and PATH

Rescissions: MWWC Welfare Reform/WIOA Adult Supportive Services Limitations and WIOA Youth Program Supportive Services Policy

Background: Supportive services assist eligible participants facing specific barriers to securing employment when no other resources are available to address their needs. Each funding source establishes parameters for allowable supportive services with the MWA responsible for setting local policy.

Within the financial limitations of the MWA funded programs, a limited supportive services system will be established to assist participants in removing barriers to enable the individual to participate in program activities including job acquisition and retention when such services are not otherwise available from other resources/sources.

Policy: Service Providers shall adhere to the limitations established for the provision of supportive services per funding source. All supportive services must relate to barrier removal to enable an individual to participate in program activities including job acquisition and retention and shall be documented in the participant’s Individual Service Strategy (ISS).

All Supportive Services must be obligated in the ISS/IEP and recorded on the Support Service Screen on the OSMIS. This entry on the Support Service Screen must include the vendor name and the total amount of the purchase. In addition, case notes shall be used to document what other resources were considered and the lack of other resources. Under no circumstance may a supportive service be provided if the supportive service is readily available in a timely manner from another source. Case notes shall be used to document the actual dollar amount and
funding source of the supportive service in cases where the OSMIS does not provide for the separate recording of supportive services.

Any combination of funding may be used, as appropriate and allowable. However, a single funding source limitation may not be exceeded with the aggregate of multiple funding sources.

The MWWC Administrative Entity may grant waivers to specific supportive services limitations and/or prohibitions. The MWWC Administrative Entity may add supportive services in the event the provision of a service has been overlooked in the formation of this policy if the supportive service is necessary to enable an individual to participate in activities.

Acceptable accounting procedures including procurement requirements shall be used in the provision of supportive services.

It is the policy of this MWA that supportive services may be provided to any eligible participant, based on need, to limit barriers in the transition to employment or to retain employment. Supportive services for enrolled WIOA participants may only be provided:

- To individuals whose family income is less than 205% of the poverty level or the Lower Living Standard (MWWC definition of self-sufficient) or the participant or family is recipient of public assistance, and
- To individuals who are unable to obtain supportive services through other programs providing services, and
- When they are necessary to enable individuals to participate in WIOA activities.

For a support service to be funded with WIOA funding, a support services assessment (Form #17-04) shall be completed. Support service eligibility will be based on an individual assessment. The customer must meet the requirements listed above for a support service to be funded with WIOA funds.

National Dislocated Worker Grants (NDWG’s) will follow Dislocated Worker Supportive Service Guidelines, unless specific guidelines are provided with the NEG. In this instance, Support Services must be provided in accordance with the guidelines.

**Action:** Service Providers shall take the appropriate actions to comply with this Policy Letter. This policy goes into effect immediately.

**Inquiries:** Questions regarding this Policy Letter should be directed to Shelly Keene at 231.660.0285 or skeene@michworkswc.org.

**Expiration Date:** Ongoing

12. Description of how the local board will coordinate WIOA funding with the provision of transportation and other appropriate supportive services in the area.

Coordination will be on a program and individual participant basis. The applicable supportive service policy is used. Unusual situations are covered on a case-by-case basis.

Supportive Services, including transportation assistance are coordinated by Talent Specialist on an individual basis, in consideration of the needs of the customer and availability of services from all sources. Where either more than one entity or program is providing services to a customer, consecutively or concurrently, the Case Managers will coordinate.

13. Local Funding Caps

The area does not have a per participant funding cap. There may be caps on specific activities, for example, there is a funding cap on an ITA under WIOA. ITA’s are renewable at intervals and a cap would apply to one issuance. The intent is to issue periodic approvals contingent on the participant making satisfactory progress toward the completion of training. Limitations may be measures of time or funding. There is always the opportunity for MWWC to waive a cap on an individual participant basis, and such requests are made by the Talent Specialist.

Training approvals are based on the needs of the individual. Coordination among programs is expected and is the norm.

Wagner-Peyser services and WIOA services do not duplicate. There is considerable overlap in the services that may be provided with Career Services. Duplication is avoided by the programs working cooperatively.

14. A description of plans, assurances, and strategies for maximizing coordination, improving service delivery, and avoiding duplication of Wagner-Peyser Act services and other services provided through the One-Stop delivery system.

Michigan Woks! West Central staff work collaboratively with Hope Network and other required partners within the One-Stop Service Centers to ensure that duplication of services is avoided. Michigan Works! Administrative team holds partner meetings to share information, discuss, and collaborate on new initiatives and resources available in each of our six counties. Informal communication takes place daily amongst the staff in each of the Workforce Service Centers.

15. A description of how the local area is planning to deliver employment services in accordance with the Wagner –Peyser Act of 1933, as amended by Title III of the WIOA.

A. The identification of a point of contact.

Kim Gager, Deputy Director
Michigan Works! West Central
B. Information regarding whether the MWA is providing employment services directly in the local area or if service providers are being used. If service providers are being used, please include the name of the provider, the type of entity, and whether or not the provider is a merit-based organization. For your of entity, please choose from the following: state governmental agency, local unit of government, special purpose unit of government, school district, intermediate school district, public community college, public university, or other.

Michigan Works! West Central, which is a special purpose unit of government, will be delivering Employment Services directly, effective July 1, 2018.

C. A description of how Wagner-Peyser funded services will be provided at no cost to employers and jobseekers.

Employment Services are provided at no-cost to employers and job seekers through the Michigan Works! Service Centers. There is a full-service center in Lake, Mason, Mecosta, Newaygo, Oceana, and Osceola counties. Both customer sectors are targeted through outreach services. Based on available funding, employer events may include: WorkKey services, employer retention visits, employer outreach for specific ES services, employer association group presentations, and general response to employer inquires. Customer services include all allowable ES services and are delivered one on one and in workshop group sessions.

The Employment Service includes the automated Pure Michigan Talent Connect, as well as additional services by specialized state employees who provide services to veterans and migrant and seasonal farmworkers.

All West Central Workforce Service Centers have been reviewed for compliance with the minimum standards, which includes being accessible to persons with disabilities.

D. An explanation on how labor exchange services will be provided using the three tiers of services: self-services, facilitated services, and staff-assisted services.

The three tiers of service are provided at each of the six Workforce Service Centers. One Career Navigator is assigned to each of the Centers. Several staff, including the two Talent Development Managers work in several counties. ES staff are available to provide assistance to customers at each of the three levels of services. All staff are full time employees. Career Navigators are the “front line” at each Workforce Service Center. They
assist customers with questions, and are available to assist or provide facilitated access to the public computers at each center.

Workshops and other training are provided periodically at most Centers by the Talent Specialist.

The three tiers of services are:

**Self-service** will be available using both the profile and job listing components of the Pure Michigan Talent Connect (PMTC) Internet-Based system and resource centers.

Access to Pure Michigan Talent Connect is provided at each Workforce Service Center. Over 100 public computers are available at all six of the centers. This counts computer labs which may be used by customers in accessing Pure Michigan Talent Connect. All customer and staff computer stations are connected to the internet and Pure Michigan Talent Connect.

**Staff-assisted self-service (facilitated)** will be available to help job seekers and employers who cannot use the PMTC or public area unaided, due to the lack of computer familiarity, literacy, disability, lack of access to the system, or some other barrier. Facilitated access will occur through an employment service worker assigned to each center.

**Mediated services** are more intensely staff assisted services that assist the customer in their job search. Mediated services include, but are not limited to, WorkKey services, career guidance, specific LMI, job search workshops, resume assistance, and other job search assistance. An individual may receive those services in a group or individual setting. Customers who receive mediated services are enrolled in one or more mediated services in the system.

E. A description of the manner in which career services are being delivered.

Career services are delivered through three different methods:

1. Self-service;
2. Facilitated, self-help services;
3. Staff-assisted service.

All persons have access to employment-related information and self-service tools, without restrictions.

All staff are proficient in career services and trained in determining when individualized career services may be appropriate to obtain or maintain employment.
F. A listing of how many staff at each site will be available to provide services.

Employment services are provided from each of the six Michigan Works! Service Centers. These are described below:

**Lake County**
The Michigan Works! Service Center in Lake County is located at 5252 M-37, just North of Baldwin. This Center has eight workstations dedicated to use for ES customers. The customer demand varies, and the Center had 4,061 customer visits in PY 16. An overflow of customers is unusual, and would often be associated with a hiring event. Lab computers may be used in the event of an overflow of customers. One ES Specialist is assigned to this Center.

**Mason County**
Mason County services are provided from the Lakeshore Resource Network Center located at 920 East Tinkham in Ludington. (This is a new location as of August 2017.) There are eight customer service computers at this site, and the Center had 5,187 customer visits in PY 16. An overflow of customers is unusual and lab computers may be used as necessary. One ES Specialist is assigned to this Center.

**Mecosta County**
Services are provided from the Workforce Service Center located at 14330 Northland Drive on the South side of Big Rapids. The Center has 16 customer service computers available, and had 12,433 customer visits in PY 16. An overflow of customers is unusual and lab computers may be used. One ES Specialist is assigned to this Center.

**Newaygo County**
The Workforce Service Center is located at 5479 West 72nd, Fremont. The Center has 10 customer service computers, and had 4,565 customer visits in PY 16. An overflow of customers is unusual, and lab computers may be used when this happens. One ES Specialist is assigned to this Center.

**Oceana County**
The Workforce Service Center is located at 195 N. Michigan Ave, Shelby. The Center has 9 customer service computers and had 5,014 customer visits in PY 16. An overflow of customers is unusual, and lab computers may be used when this happens. One ES Specialist is assigned to this Center.

**Osceola County**
The Workforce Service Center is located at 240 East Church Street in Reed City. The Center has 13 customer computer stations and had 6,635 customer visits in PY 16. In a
situation of an overflow of customers, the public computers in the adjacent computer lab are used. One ES Specialist is assigned to this Center.

G. A description of how the Unemployment Insurance (UI) Work Test will be administered. This description must include an explanation of how the registration of UI claimants will be conducted and how reporting claimant non-compliance with the “able, available, and seeking work” requirement will be managed.

Claimants may enter the registration at any location that can access the PMTC. If a claimant chooses to enter the ES registration at a location other than at the Workforce Service Center, the claimant must still come to a Michigan Works! Workforce Service Center and have the registration verified. A Michigan Works! staff member will view and verify that the claimant’s profile is in the PMTC before certifying the claimant’s registration. Completion and activation of a profile in the PMTC will meet the registration requirement.

If the claimant(s) did not create a profile in the PMTC and a Mediated Services Registration, they will not have properly completed the registering for work requirement. When the Confidential Information page is completed, a mediated services registration will be created for the claimants in the OSMIS. This will ensure that any subsequent services that the claimants receive can be reported correctly in OSMIS.

After verifying the OSMIS registration, the Michigan Works! staff member will apply a unique stamp and initial each claimant’s verification card and electronically log the name and social security number of each claimant after ES registration has been verified. Any specific evidence of a claimant’s unavailability for or lack of seeking work that comes to the attention of an individual assigned to deliver ES will be reported by completing and providing a copy of the Claimant Advice Slip, to the LARA-UIA.

Michigan Works! West Central will comply with the requirements of the Memorandum of Understanding (MOU) between the UI Agency and Workforce Development Agency, State of Michigan.

H. A description of how the Reemployment Service Eligibility Assessment requirements will be administered.

The RESEA program permanently replaces the mandatory Profiling Program. The goal of this program is to provide customized services to claimants deemed most likely to exhaust their UI benefits. Early intervention with a proactive approach should result in returning the unemployed back to work sooner.
West Central staff members must deliver all seven of the RESEA activities listed below. Given the modest number of participants over the six county area, most sessions will be with one or two participants.

1. Orientation to MWA Services
2. Confirmation of an active profile on Pure Michigan Talent Connect (PMTC)
3. Assessment of UI Eligibility performed in a confidential, personalized setting by WP merit-based staff
4. Verification of the Monthly Record of Work Search Form (Form #1583)
5. Development of an Individual Service Strategy (ISS)
6. Review specific Labor Market Information (LMI)
7. Provide at least 2 ½ hours of Reemployment Services

I. An explanation of how the MWA will participate in a system for clearing labor between the states by accepting and processing interstate and intrastate job orders as a component of the National Labor Exchange System.

Michigan Works! West Central will participate in the National Labor Exchange system for clearing labor between states by providing access to the Pure Michigan Talent Connect system and receiving and forwarding certain intra-state job orders to designated Talent Investment Agency staff for processing. West Central makes the Career One Stop site available. From this web site, customers may access the state or state’s system they are interested in using this link: http://www.careeronestop.org/jobsearch/findjobs/state-job-banks.aspx

This is available from the public computers in the lobby of each Workforce Service Center and staff assistance is available on the same basis as for those using Pure Michigan Talent Connect.

J. An explanation of how the MWA will ensure veterans will be provided access to the same employment services received by the general population. This explanation must include a description of the screening process the MWA uses to refer eligible veterans to Veteran Career Advisors for case management services and how priority of service for veterans and eligible spouses will be applied in the delivery of Wagner-Peyser funded services.

Each individual who enters the office for services will self-identify whether or not they are a veteran. All individuals who self-identify will immediately be identified that they may qualify to receive additional services from a DVOP (Disabled Veterans Outreach Program) Specialist.
If a veteran or eligible spouse is interested in pursuing DVOP services, staff will provide the customers with a DVOP Application form. Upon completion of the form, staff will review the form to determine if they qualify to receive DVOP services. Customers who are deemed qualified to receive DVOP Specialist Services will immediately be referred to the DVOP. Customers who are not eligible for DVOP services will continue to receive services from MWA staff and/or other local Veteran Service Agencies.

Michigan Works! West Central has established partnerships with various local County Veterans Representatives and National Veterans Services organizations and are co-located in several of the service centers in the six county area.

Information on various programs for veterans has also been made available at each center. As new programs are announced, the Employment Service staff is informed so that these opportunities are made available.

Michigan Works! West Central ensures it will comply with the Jobs for Veterans Act, and that Veterans Priority and other requirements will be provided.

Veterans Priority is provided in accordance with program requirements and is an automatic feature of PMTC. Veteran’s priority and other veteran’s services are further described in the ES Manual.

K. An assurance that Migrant Seasonal Workers (MSWs) will have equitable access to and receive the full range of employment services that are provided to non-MSW customers.

Services will be fully integrated with other services provided at center offices. Referrals are made for customers with complete contact information. The MWA will ensure adequate physical facilities, including telephone, equipment, storage, and Internet connection at all designated ES locations reserved for the locally based state employees. MSFWs will be provided with access to the same employment services, benefits, protections, counseling, testing, and job and training referral services received by the universal population. When the MSFW staff is not in the office, contact information is given to the customer with the staff name, telephone number, and the schedule of availability in each of our offices.

L. An explanation of the services and staffing the MWA will use to ensure that MSWs will be provided access to the same employment services, benefits, protections, counseling, testing, and job and training referral services received by the general population. This explanation shall include a description of the referral process to MSWs or other appropriate MWA staff.

Michigan Works! West Central will provide all Wagner-Peyser funded services to the Migrant Seasonal Farmworkers. The Oceana County Workforce Service Center has been
designated a significant office and will be staffed with bilingual, Spanish speaking staff to handle the flow of monolingual Spanish speaking customers.

When appropriate, Migrant Seasonal Farmworkers will be referred to the MSFW Outreach workers for services that are above and beyond what can be offered through Wagner Peyser funded services.

M. A description of any other planned services or activities for which Wagner-Peyser funds will be utilized.

Additional services in terms of workshops have been provided as part of the overall services. Other services include the program participating in Job Fairs and Rapid Response activities, as well as providing the operation of the Trade Act program. Minimal staff assistance may be provided to assist customers in using largely self-service assessments and computer based basic skill enhancement in the centers.

16. Coordination of WIOA and Adult Education

The area has three providers of Adult Education under WIOA. Michigan Works! West Central has arrangements with each of them to provide services from area Workforce Service Centers. In addition to the opportunity to refer customers in need of Adult Education to Talent Specialists, services are available on site at five Centers.

There are several literacy programs, in addition to Adult Education. These are largely operated by volunteers and often arrangements are made for services like tutoring and one-on-one on an individual basis.

17. Cooperative Agreements, MOUs

Michigan Works! West Central has contracts and MOU’s in place for the required partners identified in WIOA.

18. Grant Recipient

Michigan Works! West Central is the Grant Recipient for funding in the Michigan Works! West Central area. Michigan Works! West Central is a governmental entity that operates under the guidance of the Local Elected Official representatives of the member units of government, and in partnership with the West Central Workforce Development Board. All required documentation is on file with WDA.

All funding is disbursed in accordance with the requirements of the funding sources.

19. Competitive Process for the selection of Service Providers
Michigan Works! West Central has a through process for bidding out major program functions. However; effective July 1, 2019, all major program functions will be operated by Michigan works! West Central program staff. Service Providers will not be utilized.

Selection of Service Providers
Activities described may be condensed, accelerated or provided in an alternative format to meet specific situations and timeframes.

Service Providers will be selected on a competitive basis for one year and not more than three one-year renewals.

The following process will be used for the competitive process in selecting Service Providers. These will be in addition to the plan review process, which assist the public, agencies, potential operators, and customers in being aware of the WIOA system.

Notification of Potential Bidders
Potential bidders are notified that the RFP process has started by an advertisement in one local newspaper in each county in the RFP. A mailing or email is sent to current Service Providers and those who have indicated an interest to be placed on our “Bidder’s List” per a letter received by the MWA.

Public Meeting
A public meeting is held with potential bidders. The program vision and funding is described and questions are answered. This involves a review of the plan and requirements where several funding sources are used.

The information provided and questions answered at the public meeting are intended to give potential bidding agencies the information necessary to make an informed decision about bidding to coordinate the Workforce Service Centers.

Letters of Intent to Submit a Proposal
A Letter of Intent to Submit a Proposal is due within a short time after the meeting. A Request for Qualifications (RFQ) and the Request for Proposal (RFP) are released to agencies that have provided a Letter of Intent to Submit a Proposal.

Request for Qualifications
The Request for Qualifications provides information about the proposing agency. The RFQ asks about Conflict of Interest with the WDB/LEO and for a cost projection of several years of agency costs of operating similar programs or equivalent staff/management positions. This information from all potential bidders projected forward over a period of several years for major RFPs, is used along with historical information to conduct a cost-price analysis. In some cases, the RFQ may be released with the RFP, or at the public meeting.
Request for Proposal
The RFP is released to all bidders at the same time. The RFP provides information and instructions for preparing a proposal and the factors considered in reviewing proposals.

All bidders who have submitted a Letter of Intent receive an RFQ and an RFP, unless they withdraw prior to these issuances.

Bidders Meeting

All bidders attend a mandatory bidders meeting. The RFP is reviewed and questions are answered.

Proposal Review
Proposals are reviewed by staff and a cost-price analysis is done. Comments are provided to the WDB/LEO Review Committee. The Review Committee reviews the proposals and has a meeting to discuss the proposals. Bidders may be invited to this meeting to individually explain their proposals and answer questions.

The Review Committee rates the proposals, using a consensus method, and completes a rating sheet for the proposals.

Selection
The Review Committee makes a recommendation to the WDB/LEO on the selection of Service Provider(s). The WDB/LEO makes the final selection.

20. Proposed Local Performance Measures

A chart showing proposed local performance measures has been developed. Please see page 12.

21. High Performing Board and Programs

The WDB and LEO of Michigan Works! West Central will strive to implement oversight, plans and processes that result in high quality services and results for the people and businesses of the area.

A. Continuous Improvement Criteria

The establishment of baseline criteria for the revised standards is the first step in knowing where the area is for a starting point. The proposed measures are a reasonable starting point. The boards would expect improvement in a combination of outcomes measured on a percentage basis and the number of customers served whose performance applies to the
outcomes on a regular basis. To this end, we anticipate a quarterly review of how the area is meeting the performance measures, as interim measures of annual performance.

B. Allocation of One-Stop Center Infrastructure Funding

Funding for the basic infrastructure of the Workforce Service Centers is based on the overhead and fixed costs of each Center, and in consideration of local and partner funding. These are the basic costs of the physical plant and services.

C. Roles and contributions of partners including cost-allocation

The base contributions and cost-allocation will be in the form of rent for the use of basic Center services in the physical plant, including non-staff costs of items such as, rent, utilities, connectivity, etc.

22. Training Services for Adult and Dislocated Workers

A. Contracts for Services

Contracts for WIOA Career Services, One Stop Operator and the arrangement for the provision of training services will be as described.

Training services will be provided via ITA, OJT Agreement, including three party OJT Agreement, Incumbent Worker Agreement and Customized Training Agreements, in addition to the Career Services and Supportive Services covered in the delivery contracts. OJT agreements may include other related training, including high school completion and courses related to the OJT employment, career ladder or approved industry cluster.

Costs for training will be not more than the customary charges for training or costs determined based on approved criteria, including the % of wage the OJT reimbursement is based on. 50% is the standard determination based on wages of the worker in training.

West Central will provide OJT at reimbursement up to 75% of the wages of the worker based on:

The characteristics of the participant, including length of unemployment and skill level prior to training. (Including but not limited to)

- Worker has a disability
- Worker is an offender
- Worker does not have a high school diploma or equivalent
- Worker has exhausted unemployment insurance, was not eligible for unemployment insurance or was not in the labor force
- Worker is basic skills deficient
The size of the employer, using the previously approved scale that allows higher reimbursement for small business.

- Employer is a small or medium sized employer that has 250 or fewer employees at a given location

The Skill Level of the Position

- Training is in a Targeted Industry Cluster (Currently Manufacturing and Health Care). Industry Clusters selected by West Michigan Works! are also included
- The position is being filled as a result of Employer Based Training such as the Skilled Trades Training Fund, Incumbent Worker Training, Customized Training or a Registered Apprenticeship
- The training is a result of the employer adding new equipment or processes
- The quality of employer-provided training and advancement opportunities including wage increase or attainment of an industry recognized credential

West Central will provide OJT to employed workers when:

The employee is not earning a self-sufficient wage using the 205% of poverty or LLSIL approved by the board;

The requirements of 680.700 are met; and

The OJT relates to the introduction of new technologies, introduction to new production or service procedures, upgrading to new jobs that require additional skills, workplace literacy, or workers in an Incumbent Worker program that meets the requirements of 680.790.

Incumbent Worker training may be provided via Customized Training or OJT when the requirements of 680.790 are met. This training would be provided to employed workers.

Incumbent Worker Training may be funded for employers:

- That are in a Targeted Industry Cluster, (Currently Manufacturing and Health Care). Industry Clusters selected by West Michigan Works! are also included
- That is designed to meet the specific requirements of an employer, or group of employers to retain a skilled workforce or avert the need to lay off employees, by assisting the workers in obtaining the skills necessary to retain employment
- That is conducted with a commitment by the employer to retain or avert the layoffs of the incumbent workers

Note, in some cases, the incumbent workers who receive training to upgrade skills avert the layoff of other workers.
Cost Sharing for Incumbent Worker Training:
- Program funding will pay or reimburse the federal share of training. A sliding scale based on the size of the employer will be used in accordance with Section 134 (d) of WIOA. These are minimum non-federal shares that will be used on a “not less than” basis
  - Non Federal share is 10% of the costs for Employers with fewer than 50 employees
  - Non Federal share is 25% of the costs for Employers with more than 50 employees but not more than 100 employees
  - Non Federal share is 50% of the costs for Employers with more than 100 Employees
- The non-Federal share may include the wages paid to the employees while they are receiving training
- Incumbent Worker will not reimburse employee wages

Training:
- Training that increases the skills and/or skill level (not soft skills or broad overview)
- Increases the competitiveness of the employer and the employees receiving the training

Eligible Incumbent Workers:
- Are employed
- Have an established employment history with the employer for 6 months or more
- Michigan Residents

Additional Incumbent Worker Information
- Funding may be limited or capped for a particular project or employer
- Incumbent Worker funding may be used with funding from other programs
- Funding may be used for skilled trades for multiple employers, coordinated by an Educational Organization
- Funding may be used for skilled trades for multiple employers coordinated by Organized Labor for Registered Apprenticeships including pre-apprenticeships
- All applications are subject to review. Awards may be less than the amount requested

An ITA may be issued in the amount of the training or partial amount for a period of time, for example $5,500 and six months, and be renewable when either of those measures is used up, with appropriate waivers from the MWA Administration for higher costs or specialized training. The amount may change from time to time to keep up with training costs.

ITAs will be issued for a period of time and amount of money, but will be renewable based on progress of the participant.
B. Coordination between Training Service Contracts and ITAs

In general, participants will be receiving one type of training at a time. These activities would be coordinated with the Case Manager or Case Managers. In some cases, where participants receive several services, the two training activities would likely be related, such as an OJT employee taking a related class as part of the OJT.

Coordination happens with different partners also. In these cases, the Case Managers or appropriate staff from each partner agency work together to assure appropriate coordination.

C. Customer Choice in the selection of training programs

Customer choice for training is done with the Case Manager. There are specific criteria that need to be met in selecting training, such as the training must be in a demand occupation or one for which an employment possibility has been identified. The customer must also be suitable for the training, in being able to demonstrate the prerequisite eligibility of the training institution.

Other factors for the customer and Case Manager to consider include the costs, availability, start and end dates when training is available, and distance to training. Customer choice is made in consideration of these factors.

The customer also has significant choice in working with the Case Manager to select the type of training program to prepare for. OJT may be a good choice for a customer with some skills who can increase their knowledge while working, while other customers may be more appropriate for a more structured training at an institution.

23. Comment Period

The local board will provide a copy of the draft plan to interested parties and publish a link on the MWA website to meet the 30-day comment period. In addition, mandatory partners have had an opportunity to be involved in goal setting and plan content prior to publication.

24. Transition to an Integrated, Technology-enabled and Case Management system

West Central will continue to use the state MIS system, and will work with other programs to expand the use of the system for other programs. West Central will follow WDA guidance and timeframes to assure the area is part of an integrated statewide system. In the interim, information will be shared with WIOA partners. West Central does not plan to develop a local system, unless we are directed to do so.

25. Local Priority for Service
Priority for selection will be based on the federal priorities, including veteran’s status, poverty, public assistance and several local priorities. Priorities include recipients of food assistance, persons within 205% of the poverty level or the Lower Living Standard which is also the local definition of self-sufficiency, persons interested in training in an approved Industry Cluster, and persons living in the zip code of a city identified as a Project Rising Tide Community. For Region 4a, currently this is Evart, although it includes any future designation. West Central recognizes the Industry Clusters selected for West Michigan Works! as part of the regional effort to promote employer driven training and broaden the scope of training opportunities for participants to meet the needs of employers.

These priorities for service are intended to both follow the federal guidelines and add emphasis and services to job seekers and employer customers in the Industry Clusters and Project Rising Tide Community (ies).

The 205% of the poverty level or the LLSIL is intended to include those who are not economically self-sufficient.

26. Local Coordination of Workforce Investment Activities with Statewide Rapid Response Activities

West Central will coordinate Workforce Investment Activities with Statewide Rapid Response.

This includes notifying WDA of closures or layoffs, and coordinating the presence and involvement of local agencies.

West Central will also coordinate, arrange and provide services as part of Rapid Response Activities.

27. Rapid Response Activities

A. Initial Rapid Response Meeting

West Central will arrange for initial meetings with the employers and employees as necessary, including organized labor representatives. West Central will provide staff members for WIOA Dislocated Worker, as appropriate, and others as needed to support the State’s Rapid Response Efforts.

B. Worker Orientation meetings for Employees with Union Officers as applicable

West Central will arrange and provide staff to meet with workers for Worker Orientation. This includes the Employment Service, WIOA Dislocated Worker and Trade Act program if applicable, and any other appropriate resources identified.
West Central Employment Service staff will coordinate with the WDA Rapid Responses on company closings and permanent worker layoff situations. The Rapid Response will include the WDA and the MWA for Dislocated Worker funding.

Following discussion of the specific situation with TIA and the company/workers, additional resources will be made available to allow worker choice in looking at job and training choices. The full range of choices will be made available in a coordinated manner. This includes working with a Joint Adjustment Committee where these are appointed. There may be a Rapid Response meeting and one or more worker orientation meetings with the employees and appropriate agency resources.

Michigan Works! West Central’s role in the function of the JAC’s will be to assist and facilitate to the extent needed with TIA, the workers and company’s establishment of a JAC. Michigan Works! West Central would assist in seeking out candidates to be selected by the workers to staff and facilitate the JAC and to participate as support to answer questions. The JAC is the worker’s organization, so all assistance would be to provide information and choices, not to direct or run the JAC.

C. Layoff Aversion

Layoff aversion will be one of the first topics discussed with the employer, to determine if training assistance could be helpful, and likely to avert layoffs. Layoff aversion efforts may involve referral to MEDC and local Economic Development professionals who may be able to assist the employer in seeking alternate products or markets may be provided. Training may also be an option in a pre-layoff situation. Incumbent Worker Training may be used as appropriate.

If training can assist in averting layoffs, an Incumbent Worker application will be initiated. The training may take form of customized training, OJT or a combination of the two. Training may be provided to workers who are at risk of being laid off, or when it impacts on workers who would be laid off. These efforts will be coordinated by Michigan Works! West Central working with the company, and any training providers that may be involved. Michigan Works! West Central will facilitate the application and registration of the workers.

D. Request for State Adjustment Grant

A State Adjustment Grant or SAG may be requested when a major employer has a layoff event, but is more likely to be requested in response to a downturn that affects a number of employers and workers who work or reside in the area. A SAG may be requested when it becomes apparent that current funding is or will soon be obligated and there are continued and significant requests for training from eligible workers.
E. National Dislocated Worker Grants (NDWG)

Michigan Works! West Central will apply for National Dislocated Worker Grant (NDWG) funds as necessary. NDWG grant funds are discretionary funds awarded by the Secretary of Labor to serve dislocated workers and other eligible individuals affected by major economic dislocations, emergencies or disasters. Michigan Works! West Central will work together with the State of Michigan to secure the funding when the need arises.

F. Local Policy on Coordinating Workforce Investment Activities with Statewide Rapid Response Activities.
Date: November 8, 2016
To: MWWC Service Providers
Subject: Rapid Response

Reference: The Workforce Innovation and Opportunity Act
Workforce Innovation and Opportunity Act Final Rule
TIASOM Pl 12-02, WIA Layoff Aversion Strategies and Policy Guidelines, for IWT Programs, including IWT Waiver Approval Process, issued June 20, 2012

Programs Affected: Workforce Innovation and Opportunity Act (WIOA) Dislocated Worker Program

Rescissions: None

Background: The central purpose of Rapid Response is to help laid-off workers quickly transition to new employment. Rapid Response acts as both a provider of direct reemployment services and as a facilitator of additional services and resources. Rapid Response is a primary gateway to the workforce system for both dislocated workers and employers and is a component of a demand driven system.

Policy: The MWA and Service Provider for Employment Services will coordinate with the TIA Rapid Responses on company closings and permanent worker layoff situations. The Rapid Response will include the TIA, the MWA, and the Service Provider for Dislocated Worker funding and the Employment Service Provider.

Michigan Works! West Central will arrange for initial meetings with the employers and employees as necessary, including organized labor representatives. Michigan Works! West Central will arrange and provide Service Provider staff to meet with workers for Worker Orientation. This includes the Employment Service, WIOA Dislocated Worker programs, Trade Act program if applicable, and any other appropriate resources identified. General information and access to the unemployment compensation benefits and programs will be offered during the Worker Orientation meeting. Information will be provided for any health coverage
or additional benefits that the participants may be eligible for. A brief overview of the WIOA career services will be provided along with information on the possibility of attending reemployment workshops. WIOA training services will also be discussed to provide the participants with an opportunity to further their training to allow them to re-enter the workforce more quickly. This information is also available every day at each of the service centers.

In addition to general information, the Michigan Works! West Central Service Providers, along with the Business Services staff will offer the possibility of hosting workshops or job fairs that are specifically tailored to those individuals who are affected by the lay-off. These services can be made available directly at the facility that is closing, at one of the service centers, or a location that may be deemed appropriate.

Michigan Works! West Central Business Services staff and Services Providers will be proactive in identifying and gathering information for early warnings of potential layoffs or opportunities for layoff aversion. Early warning systems are necessary to ensure a timely response to worker dislocations. Layoffs will be identified by meetings with employers, newspaper articles, laid-off workers visiting the service centers, information from local Economic Developers, and WARN notices. Business Services staff will develop and maintain relationships with local employers to ensure that early information is shared.

Layoff aversion will be one of the first topics discussed with the employer, to determine if training assistance could be helpful, and likely to avert layoffs. Layoff aversion efforts may involve referral to MEDC and local Economic Development professionals who may be able to assist the employer in seeking alternate products or markets may be provided. Training may also be an option in pre-layoff situation. Incumbent Worker Training may be used as appropriate.

If training can assist in averting layoffs, an Incumbent Worker application will be initiated. The training may take form of customized training, OJT or a combination of the two. Training may be provided to workers who are at risk of being laid off, or when it impacts on workers who would be laid off. These efforts will be coordinated by Michigan Works! West Central working with the company, and any training providers that may be involved. Michigan Works! West Central will facilitate the application and registration of the workers with Service Providers.

Michigan Works! West Central will apply for National Dislocated Worker Grant (NDWG) funds as necessary. NDWG grant funds are discretionary funds awarded by the Secretary of Labor to serve dislocated workers and other eligible individuals affected by major economic dislocations, emergencies or disasters. Michigan Works! West Central will work together with the State of Michigan to secure the funding when the need arises.
Michigan Works! West Central’s role in the function of the JAC’s will be to assist and facilitate to the extent needed with TIA, the workers and company’s establishment of a JAC. Michigan Works! West Central would assist in seeking out candidates to be selected by the workers to staff and facilitate the JAC and to participate as support to answer questions. The JAC is the worker’s organization, so all assistance would be to provide information and choices, not to direct or run the JAC.

A State Adjustment Grant or SAG may be requested when a major employer has a layoff event, but is more likely to be requested in response to a downturn that affects a number of employers and workers who work or reside in the area. A SAG may be requested when it becomes apparent that current funding is or will soon be obligated and there are continued and significant request for training from eligible workers.

The Executive Director of Michigan Works! West Central will be primarily responsible for the MWA role in the JACs, SAGs, and NDWGs. His contact information is:

Mr. Paul J. Griffith, Executive Director  
Michigan Works! West Central  
14330 Northland Drive  
Big Rapids, MI 49307
